The design of this Wendy chair is inspired by a classic design - the Windsor chair: the original Windsor chair is completely made of solid wood, the chassis is light in structure, the weight is not enough, it is easy to break, and the material is single. But our Wendy chair has been improved on the original basis. Metal elements are added to make the whole structure more stable and more suitable for restaurants. The Wendy chair is made of matt black metal round tube legs and white oak solid wood seat board imported from North America. The backrest is made of stainless steel round tubes made of electroplated gold or stainless steel bright light + oak solid wood. The diversification of materials improves the texture of the product and makes the product more attractive. It looks more advanced. At the same time, it can be matched with a thin cushion to meet multi-functional needs.
